AI Audio & Video Data Training Portfolio

Total Project Hours: 470 Hours

PROJECT EXPERIENCE

Acting Class (Video Data Collection) | RWS

- **Duration:** 35 Hours
- **Scope:** Recorded short (2–20 seconds), natural actor-style video performances from memory in multiple languages.
- **Details:** Maintained strict technical compliance including audio setting, native camera resolution/FPS settings, and proper lighting. Ensured high-quality deliveries free of disturbing noise yet maintaining natural background, screen-reading behavior, and visual artifacts.

Multilingual Voice Recording & Constraint Adherence | Mercor

- **Duration:** 150 Hours
- **Scope:** Executed targeted voice recording tasks in both Indonesian and English.
- **Details:** Delivered high-quality audio clips strictly adhering to specific thematic constraints and precise duration categories (<1 minute, 1–3 minutes, and >3 minutes).

Advanced Audio Transcription & Annotation | RWS

- **Duration:** 200 Hours
- **Scope:** Conducted comprehensive corrections on raw audio transcriptions based on rigorous guidelines.
- **Details:** Applied precise formatting for punctuation, fillers, non-speech voices, and stutters. Managed complex multi-speaker tagging, emotion labeling, and exact audio segmentation.

Detailed Transcription Correction | Mercor

- **Duration:** 50 Hours
- **Scope:** Performed in-depth correction and quality assurance on raw audio transcriptions.
- **Details:** Ensured high accuracy in speaker attribution, non-speech element tagging, and precise audio segmentation similar to rigorous RWS standards.

Multimodal Emotion Labeling (Audio-Video) | Appen

- **Duration:** 25 Hours
- **Scope:** Evaluated both audio and visual inputs to assign highly precise emotion labels in knowledge podcasts and movies.
- **Details:** Analyzed facial expressions in tandem with vocal tones and speech elements to ensure nuanced, accurate, and context-aware data annotation.

Audio Transcription Review | Uber

- **Duration:** 10 Hours
- **Scope:** Delivered transcription corrections and quality checks.
- **Details:** Focused on strict adherence to guidelines covering punctuation, non-speech tagging, and precise audio segmentation.
