

MOST EXCITING PROJECT

MEDICAL RECORDS

created by Regine Calubiran

PROBLEM STATEMENT

There are instances that when patient is requesting a copy of their medical history it is hard to find it because of manual storing of data there are times when the records fall on a later date the records are harder to find or no longer available.

SOLUTION

Electronic
Medical Records

- Providing accurate and complete information about patients at the point of care
- Enhancing privacy and security of patient data
- Reducing costs through decreased paperwork, improved safety, and improved health.

PROCESS TO SOLVE THE PROBLEM

01

Meeting with the BA Team

02

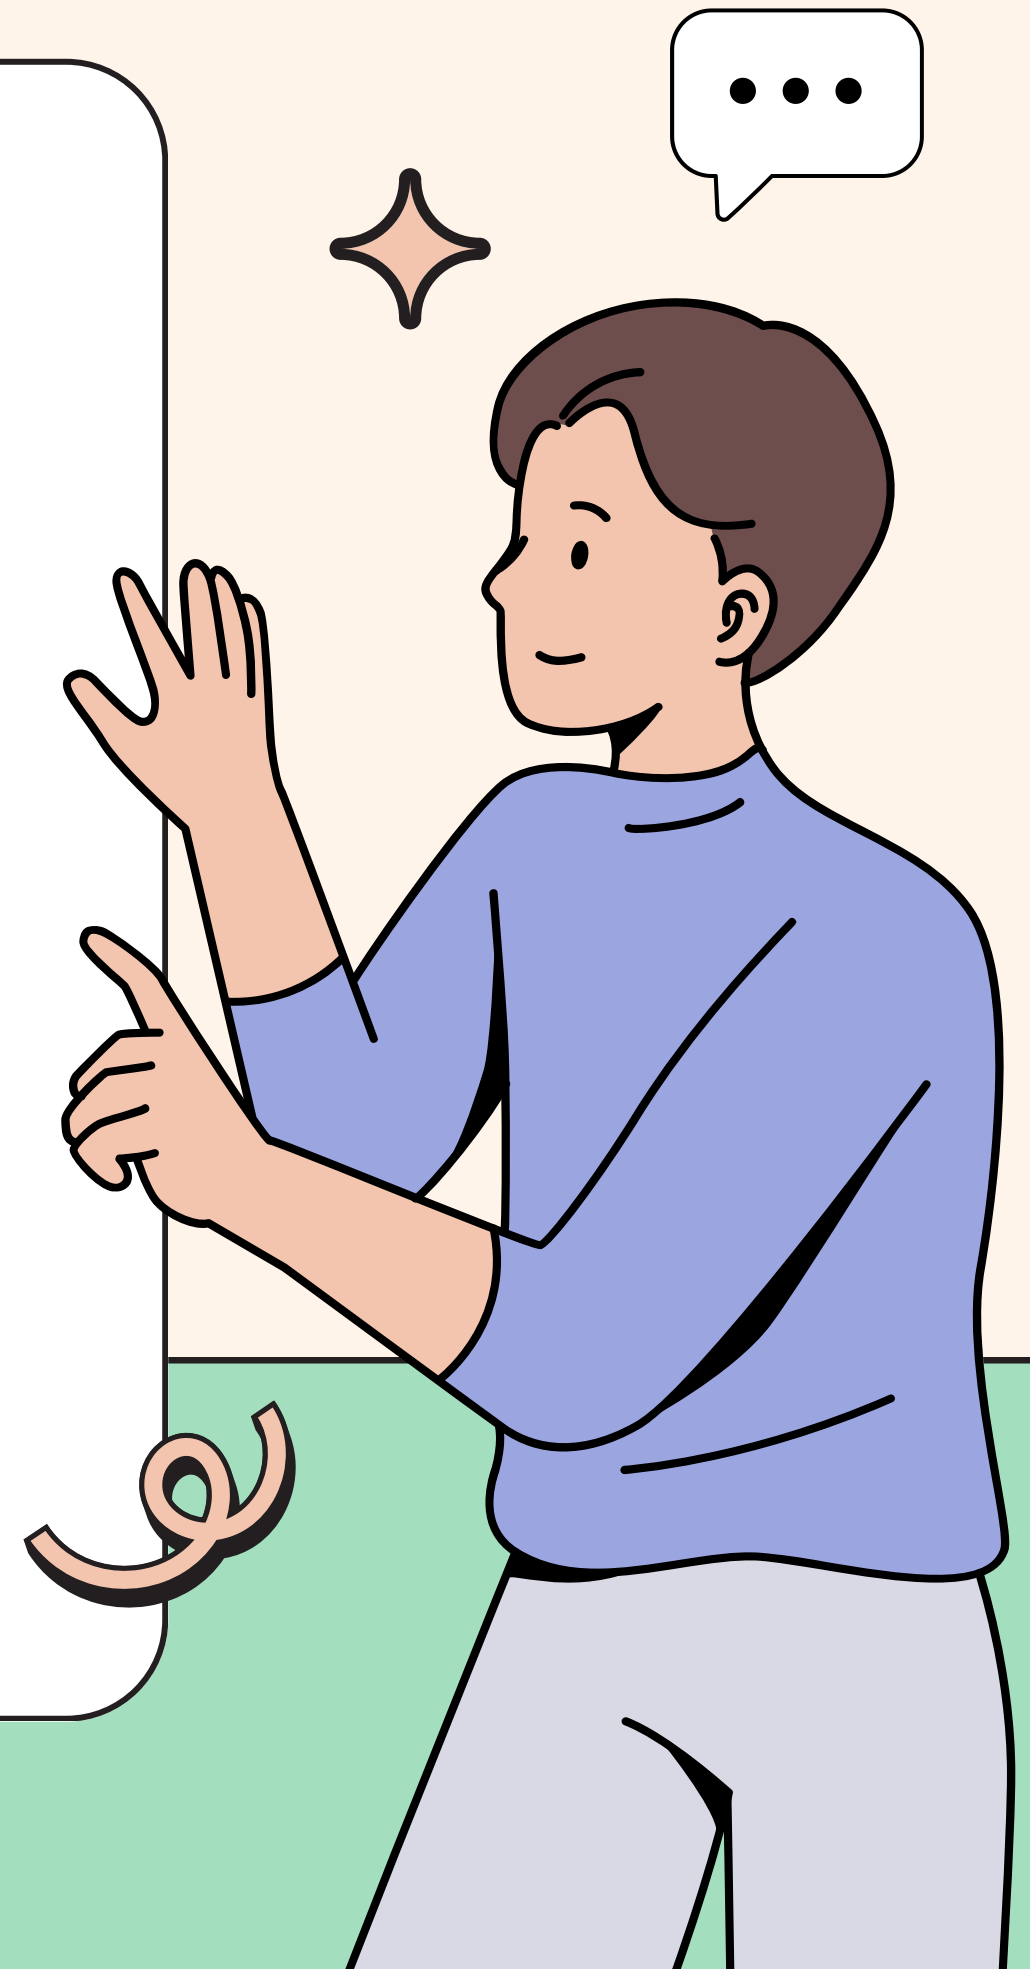

Come up with the design

03

Coordinate with the client

04

Relay to the developer

OBSTACLES FACED

01

Communication with
the client

02

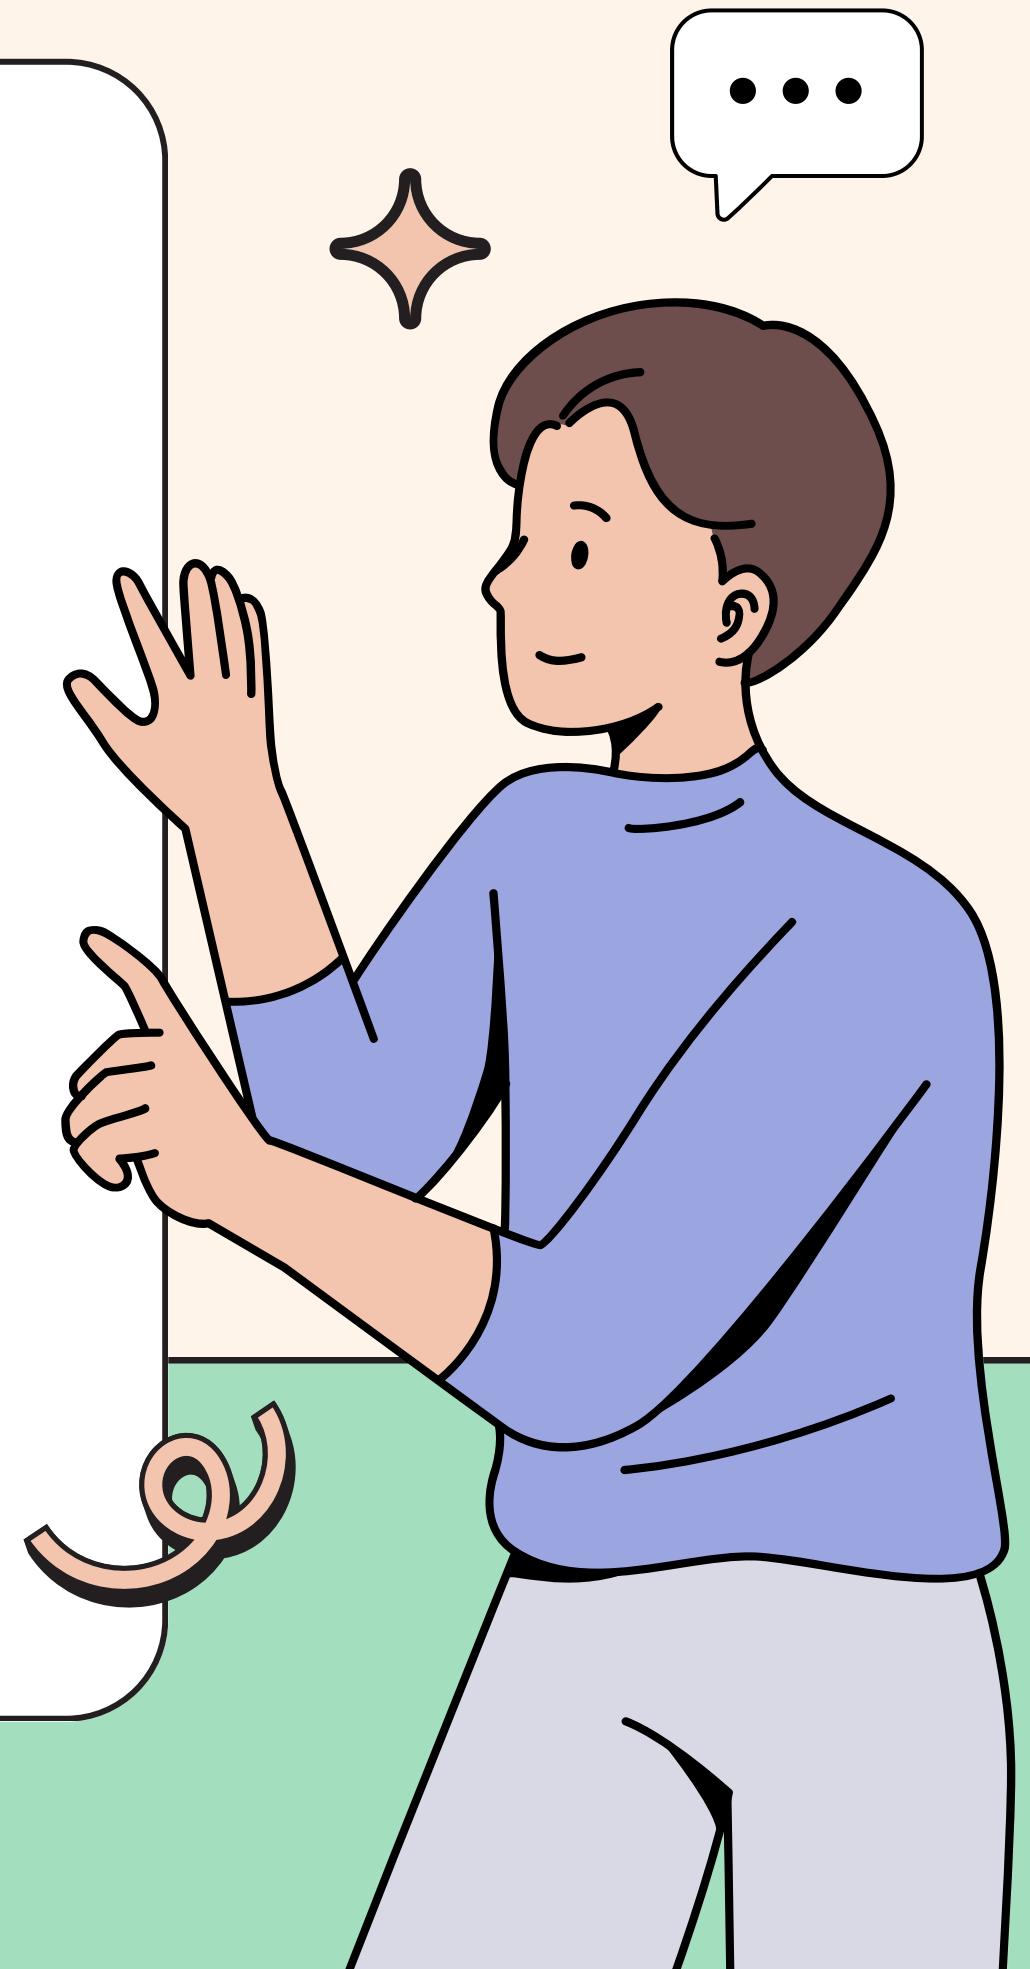

Under manpower

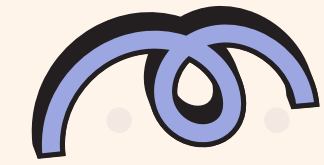

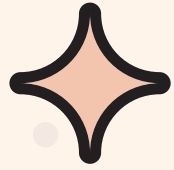

03

Limitation of the
design

Knowledge and skills gained

Staff are not open with the idea of electronic medical records

LESSONS LEARNED

I was able to learn about the process of implementation of a project from the start until end and also to communicate effectively.
