

Hey there,

I'm Kim Roland Berame

Software Developer - Undergraduate

About Me

I am a dedicated individual with a strong programming background and excellent problem-solving skills. With hands-on expertise in front-end development using **ReactJS**, **JavaScript**, **TypeScript**, and **Flutter Dart**, I actively contribute to projects, demonstrating my commitment to expanding my skills and knowledge. I am a proactive, detail-oriented team player, striving to deliver high-quality solutions while fostering personal and professional development.

Work Experience

August 2024 - Present
Software Developer | OnCloud

- Working on various tickets and tasks ranging from front-end development to logic implementation and data binding using ReactJS and Typescript.
- Collaborating with a cross-functional team including project managers, technical leads, QA specialists, and other developers to deliver high-quality solutions.

Recent Projects

These are my projects, ranging from contributions to company projects to personal endeavors. Each one reflects my commitment to quality and innovation, whether solving complex problems for clients or exploring new technologies for individual growth. Each project is a testament to my technical skills and a deep understanding of user needs, aiming to create impactful solutions that resonate with users and promote positive change.

GRIFFIN31

OnCloud

ECOPOINTS

Capstone Project

STATS & ESTATES

School Project

HAVENCHAT

Hobby Project

GRIFFIN31 - GRIFFIN31.COM

OnCloud Contribution

A cutting-edge product that assesses your M365 security configuration, identifies potential vulnerabilities, and continuously monitors and alerts for any security configuration change

- Tasked with various tickets and tasks ranging from front-end development to logic implementation and data binding using ReactJS and Typescript.

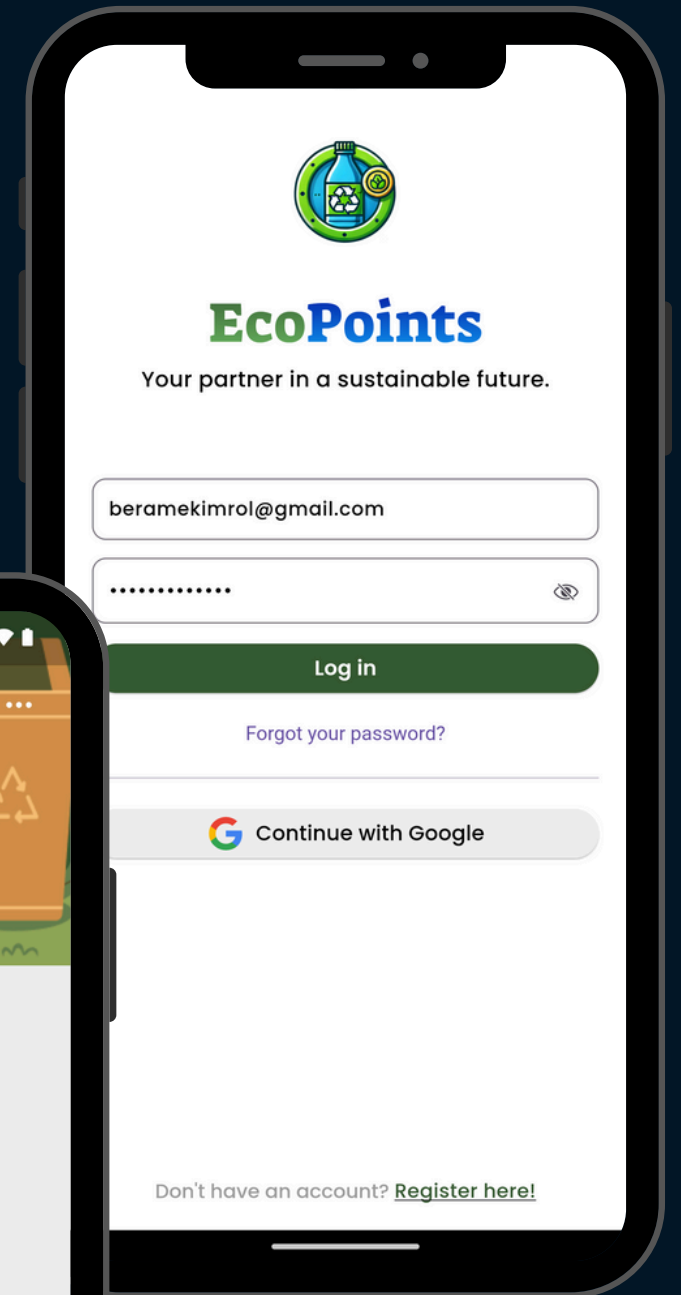

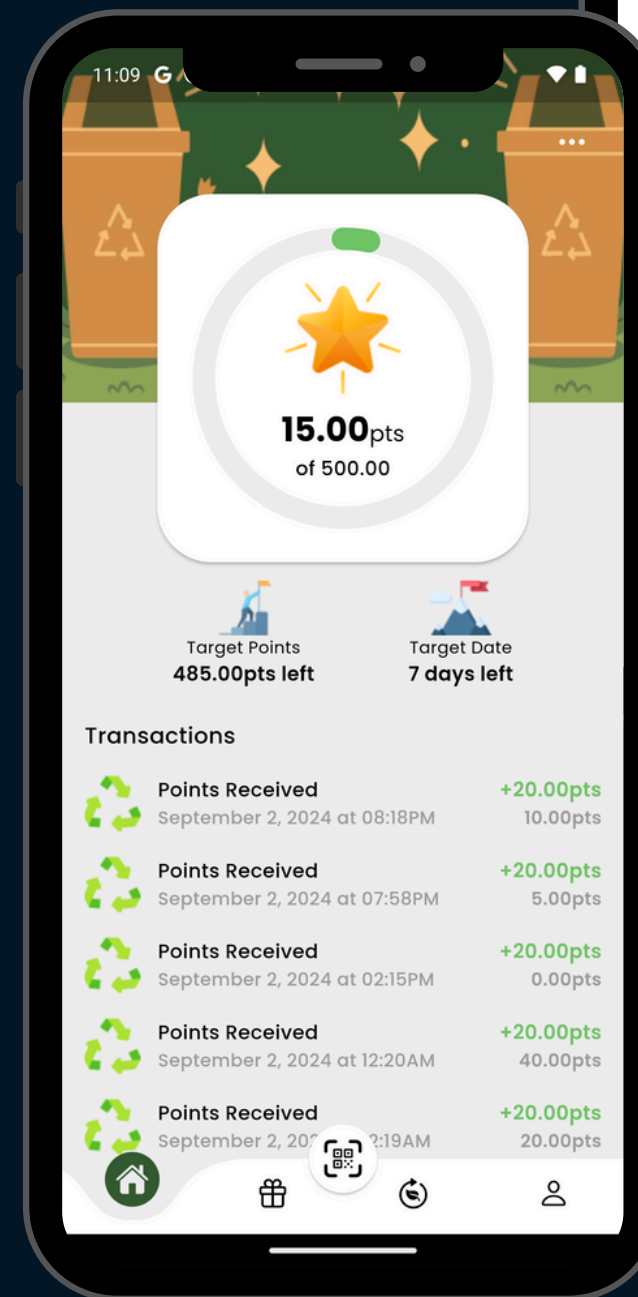

ECOPOINTS - MOBILE DEVELOPER

Group Capstone Project

This project aims to boost recycling at the University of San Jose - Recoletos with a gamified point-based reward system. A semi-smart trashcan tracks deposited bottles, awarding points redeemable for school-related rewards like meals, supplies, or event tickets, encouraging consistent recycling.

Tech Stack:

- Firebase
- Flutter Dart
- ReactJS (Redux)
- Typescript
- IoT
- Git / Github

STATS & ESTATES - MOBILE DEVELOPER

Group School Project

A mobile real estate app that offers rental listings along with area statistics like crime rates, amenities, commuter efficiency, and school ratings, helping users make informed property decisions.

Tech Stack:

- Firebase
- Flutter Dart
- Git / Github

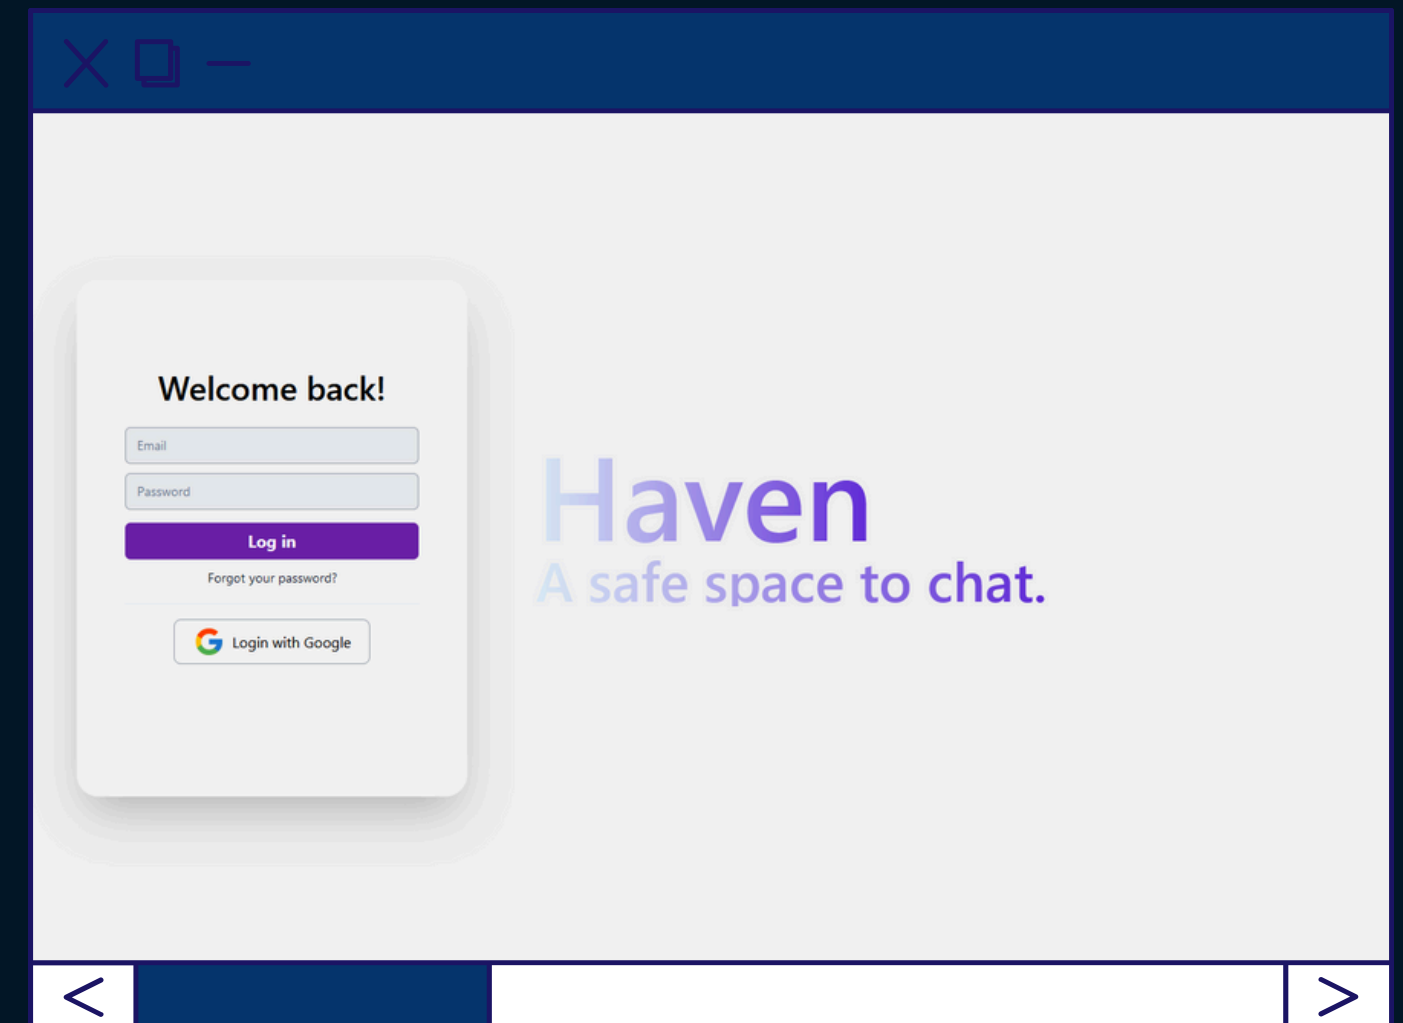

HAVENCHAT - WEB APPLICATION

Hobby Project - WIP

A web app for real-time, encrypted messaging via Google email, ensuring secure communication.

Tech Stack:

- Firebase
- ReactJS (Next.js)
- Typescript
- Git / Github

Thank You ...

“Fear is temporary, regret is forever.”
