Academic Experience

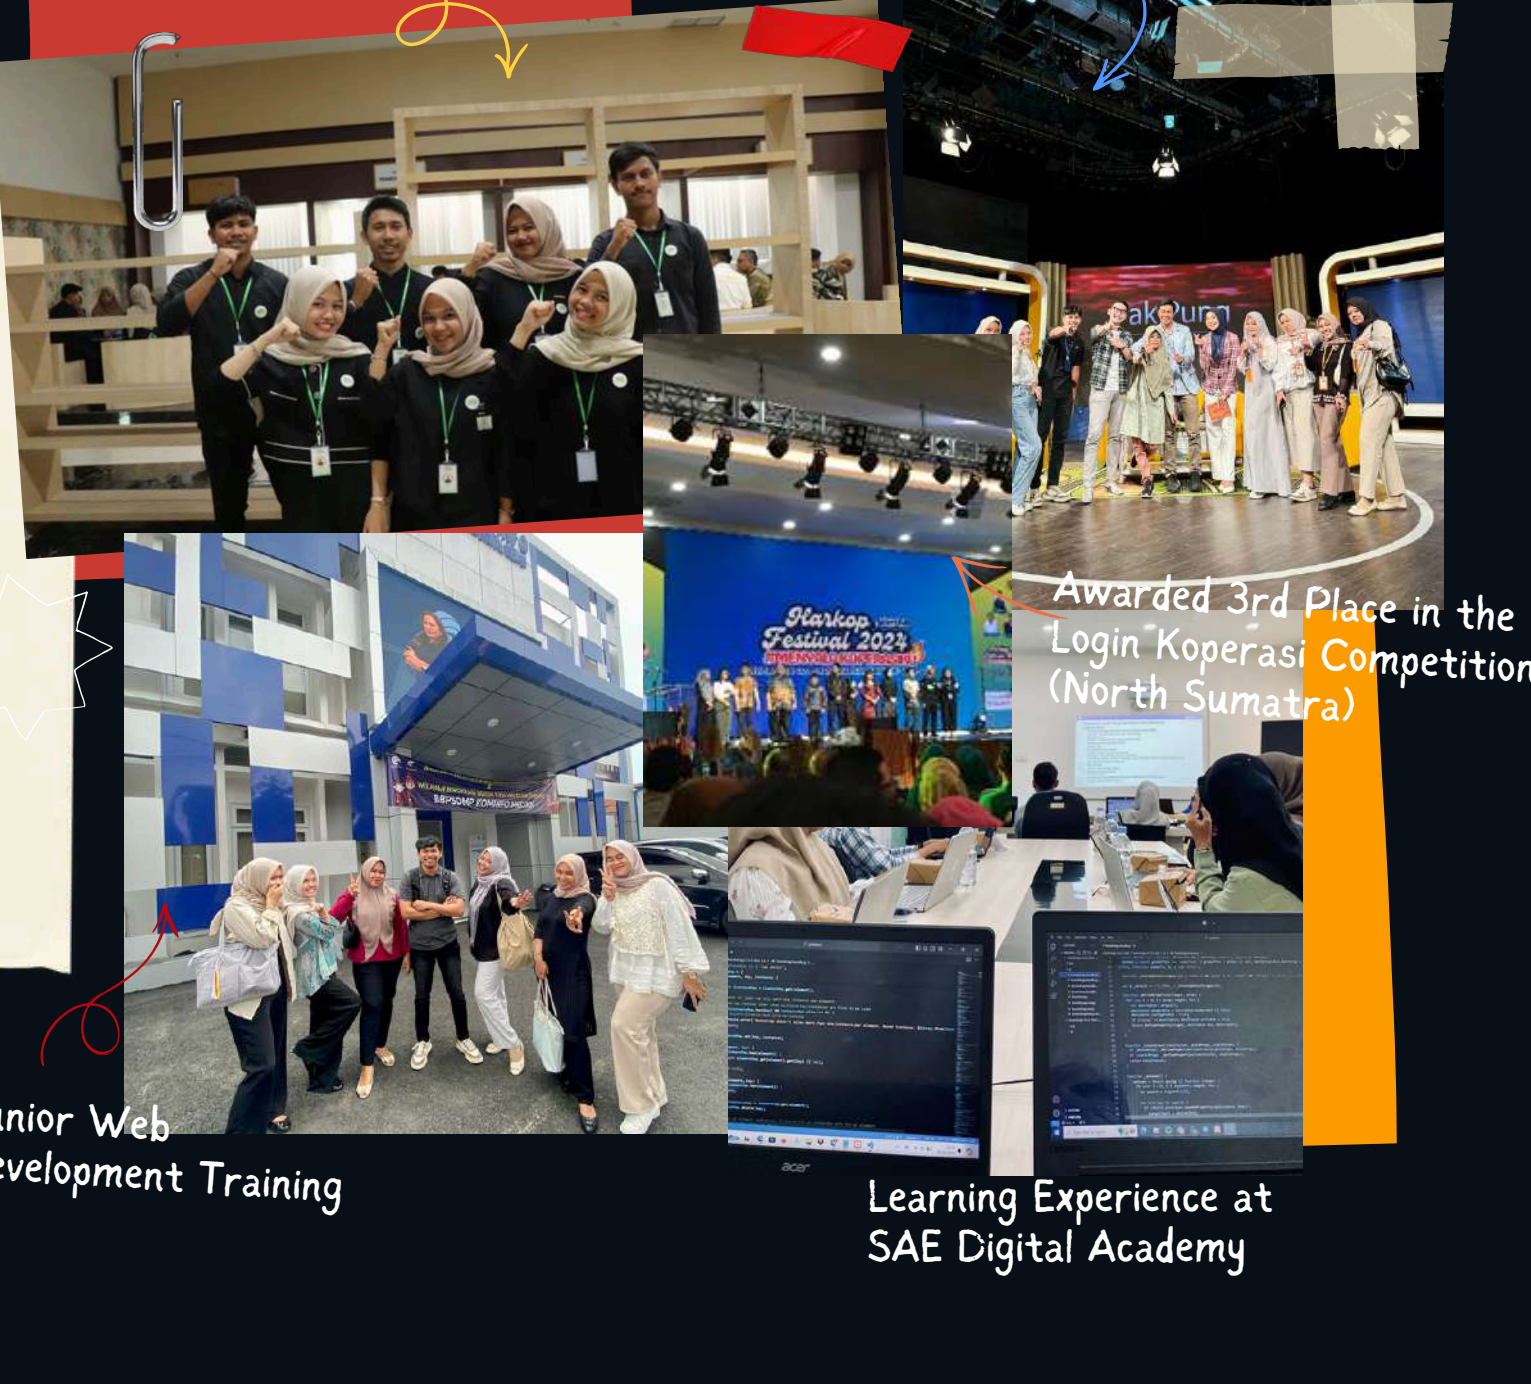

Student Exchange Experience (MBKM)

Participated in the MBKM student exchange program at Institut Teknologi Bandung, which emphasized the importance of tolerance among diverse religions, ethnicities, and cultural backgrounds while providing the opportunity to explore the richness of West Java's culture firsthand. During the program, I was able to adapt quickly to a new environment, build strong communication with students from various regions, and actively engage in both academic and collaborative activities. This experience not only broadened my academic perspective but also strengthened my interpersonal skills, teamwork, and appreciation for diversity in everyday life.

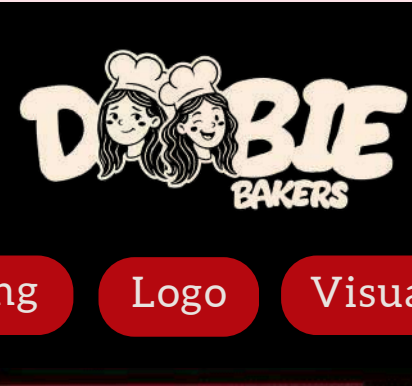

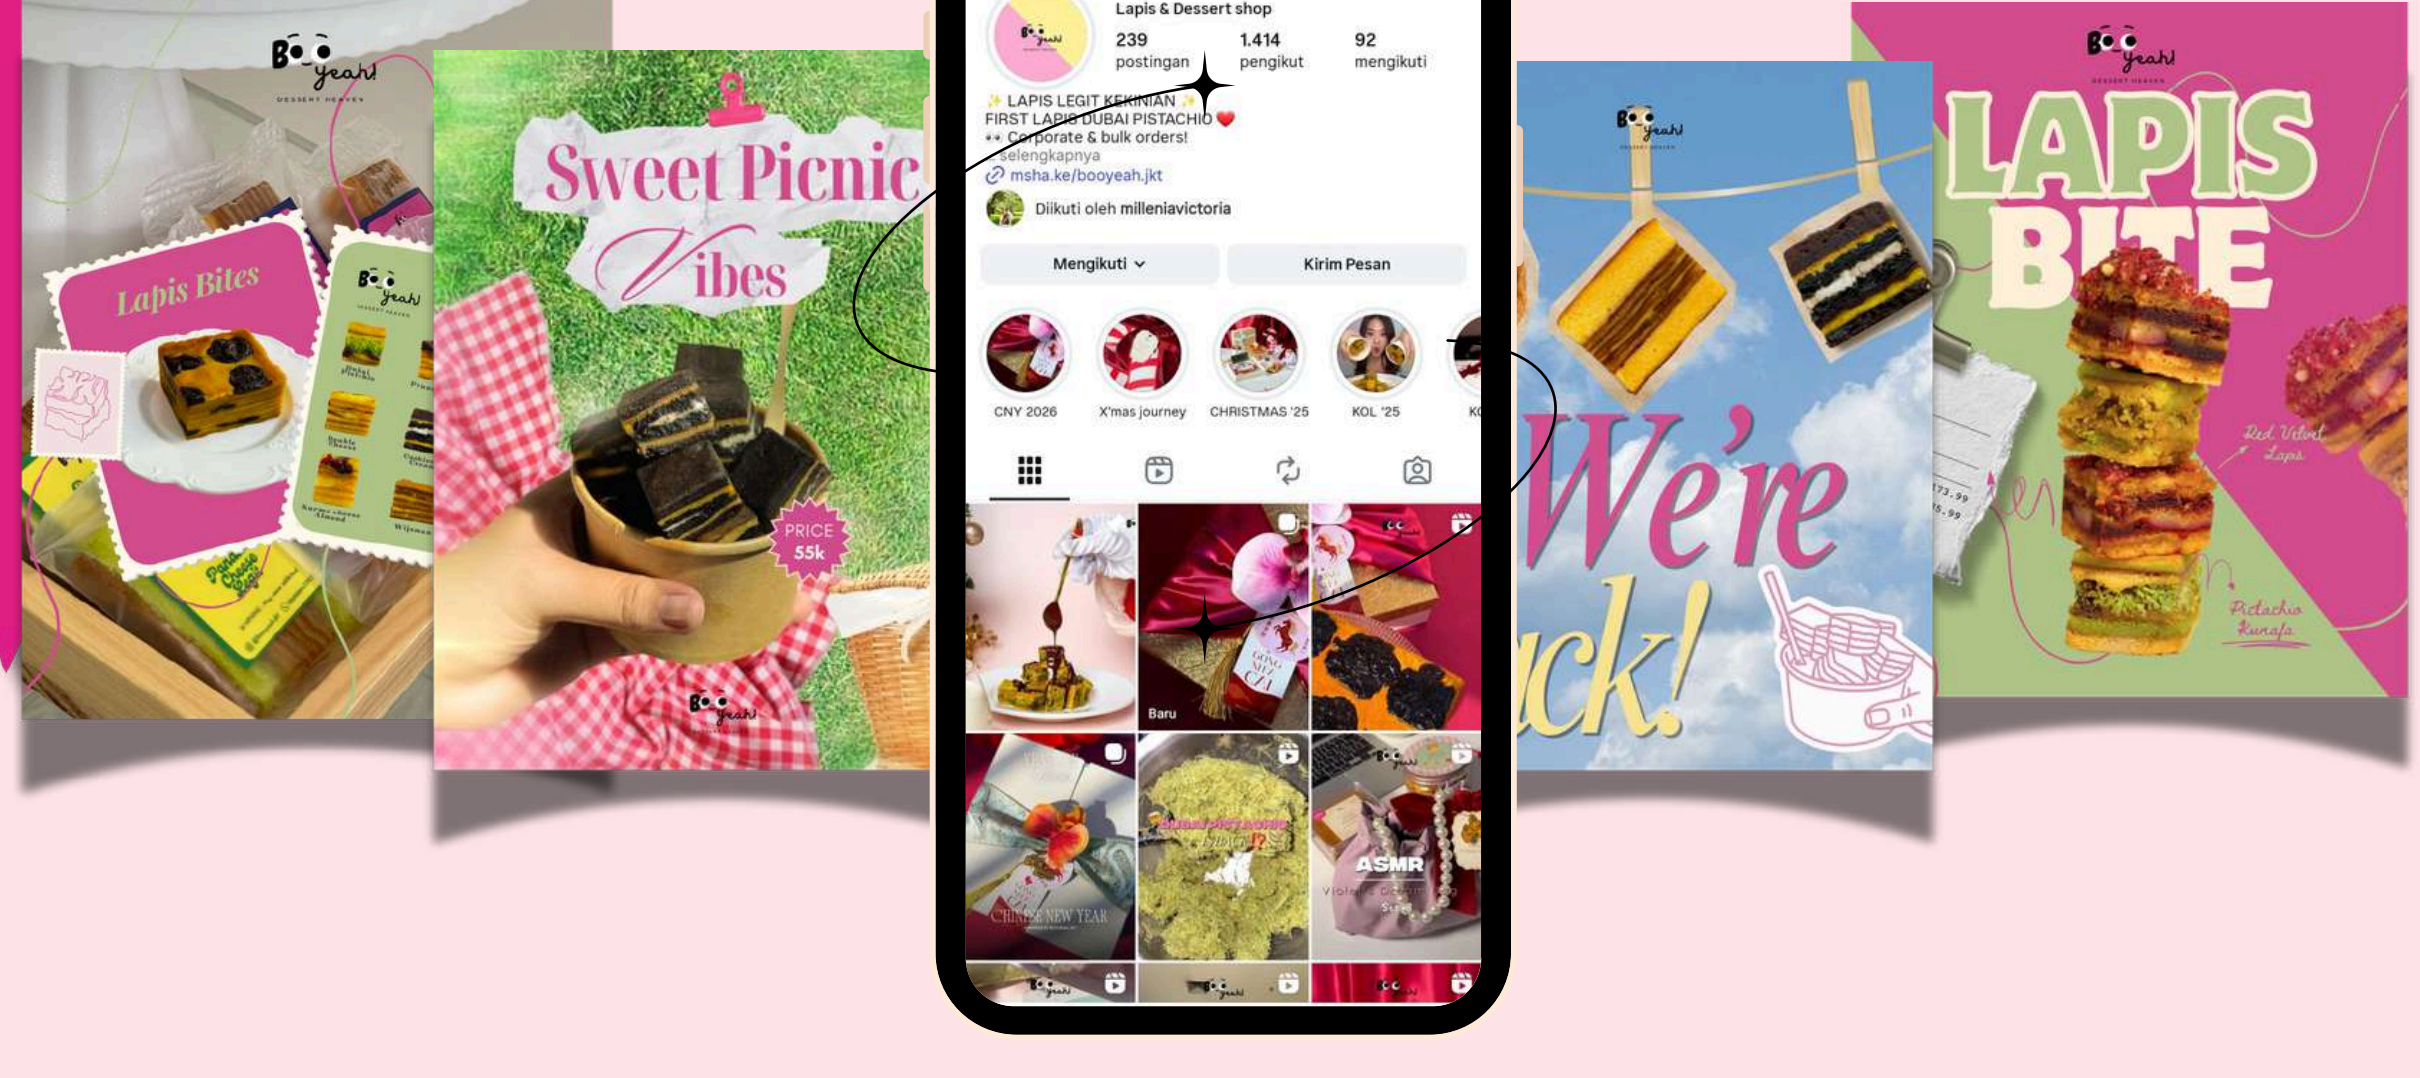

Internship Experience Sae Digital Akademi

It was a truly valuable opportunity to intern at SAE Digital Academy. During this experience, I was able to grow from having little to no knowledge into gaining practical skills and confidence. I learned coding from the ground up, participated in various training programs, and worked on real tasks and projects directly from SMEs and clients. Beyond the professional experience, the internship was also filled with meaningful moments—enjoyable activities, team bonding, and even short trips that made the journey even more memorable. The sense of togetherness with fellow interns made this experience not only educational but also deeply unforgettable.
